Professional Profile

Apple operations and analytics professional combining a Quality Business Analyst rotation with fraud investigation and stakeholder support experience. Skilled in Tableau reporting, SQL and Snowflake analysis, data validation and Python/Excel reporting automation. Supported workforce dashboards and operational decisions across Austin, Singapore and Cork. Holds a Higher Diploma in Data Analytics and a Master's in Osteopathy; currently completing an MSc in Artificial Intelligence. Interested in applying these skills to healthcare performance and provider analysis.

Core Skills

Business intelligence: Tableau dashboards, KPI reporting, trend analysis, workload forecasting support and translating findings into recommendations.
Data management: SQL, Snowflake, Excel, Python, data quality checks, reporting automation and investigation of inconsistent outputs.
Stakeholder delivery: Requirements gathering, user feedback, leadership reporting, cross-functional coordination and clear documentation.
Investigation: Evidence assessment, anomaly detection, attention to detail, prioritisation and confidential information handling.

Professional Experience

Quality Business Analyst - Workforce Optimisation Rotation

Apple, Strategic Data Solutions - Cork Sep 2025 - Feb 2026

- Supported Tableau workforce-management dashboards end to end for teams in Austin, Singapore and Cork, tracking case inflow, productivity, backlog and service-level performance.
- Used SQL and Snowflake to source and validate reporting data; worked with Data Engineering to investigate data integrity issues and verify downstream outputs.
- Used Python and Excel to automate recurring reporting and analyse operational trends supporting workload forecasting and capacity decisions.
- Gathered user feedback, delivered dashboard improvements and explained findings to leadership and operational stakeholders.

Fraud Prevention Specialist

Apple, Strategic Data Solutions - Cork Apr 2022 - Present

- Investigated more than 22,000 payment-related transactions with 99.41% verified accuracy across EMEA and AMR in a high-volume environment.
- Identified anomalous patterns, assessed incomplete evidence and documented the reasoning behind decisions and escalations.
- Communicated findings to relevant stakeholders and balanced competing priorities while protecting sensitive information.

Technical Support Supervisor and Mentor

AppleCare, Apple - Cork Oct 2019 - Apr 2022

- Owned complex customer issues through investigation, escalation and resolution while maintaining customer satisfaction above 95%.
- Mentored advisors and monitored service metrics to identify recurring issues and improve support quality.

Education

MSc Artificial Intelligence - in progress Expected 2027
Munster Technological University, Cork

Higher Diploma in Data Analytics 2023 - 2025
National College of Ireland, Dublin

Master's in Osteopathy 2014 - 2019
IDHEO, Nantes, France
Healthcare education complementing subsequent experience in operational analysis and investigation.

Professional Diploma in Corporate Fraud Investigation 2023
City Colleges, Dublin

Selected Analytics Projects

PISA Data Analysis and Predictive Modelling
GitHub | Project website

- Built a reproducible Python, SQL and Google Cloud workflow for processing large education datasets, including transformation, validation, modelling and reporting.
- Explored patterns and compared predictive approaches, documenting data preparation and model results to make the analysis traceable.
- Communicated findings through visual summaries and clear explanations of the underlying data and analytical limitations.

LLM Evaluation - Accuracy, Confidence and Cross-Locale Analysis
GitHub | Project website

- Built a structured Python evaluation comparing Gemma 3 12B and Qwen 3 8B across five country contexts.
- Examined accuracy, confidence and error patterns to identify differences hidden by aggregate performance measures.
- Produced documented methodology and visual reporting, strengthening practical skills in comparative analysis and communicating uncertainty.

Tools and Languages

Reporting and data: Tableau, Microsoft Excel, SQL, Snowflake, Python, pandas, DuckDB and Parquet.

Project tools: Google Cloud, Git/GitHub and reproducible analytical notebooks.

Languages: French (native); English (professional fluency).

Location: Based in Cork, Ireland.
