

Simon Gobin

Technical Operations and Data Automation | Python | Incident Investigation

Cork, Ireland | +353 89 603 1609 | simon.gobin.do@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Profile

Apple technical operations and analytics professional with more than six years across Strategic Data Solutions and AppleCare. Experienced in complex issue triage, root-cause investigation, Python and SQL automation, Snowflake data integrity, operational dashboards, and cross-geography collaboration. Contributed to an internal container-build and deployment workflow for a secure workforce data prototype. Currently completing an MSc in Artificial Intelligence, including hands-on ROS 2 robotics work in a Linux environment, with particular interest in reliable automation and ML-assisted service operations.

Technical Skills

Automation and data: Python, SQL, Snowflake, DuckDB, pandas, Parquet, data validation, repeatable reporting workflows

Delivery and platforms: Linux command line, ROS 2, Git/GitHub, Docker images, RIO/Shuri deployment exposure, Google Cloud projects

Operational insight: Tableau dashboards, KPI monitoring, anomaly investigation, issue triage, troubleshooting, root-cause analysis, technical documentation

AI/ML: TensorFlow/Keras, Scikit-learn, model evaluation, LLM API integration, confidence analysis, secure AI-assisted tooling

Professional Experience

Quality Business Analyst – Workforce Optimisation Rotation

Sep 2025 – Feb 2026

Apple, Strategic Data Solutions

Cork, Ireland

- Supported Tableau workforce-management dashboards end to end for teams in Austin, Singapore, and Cork, monitoring case inflow, service-level performance, productivity, and backlog trends.
- Used SQL, Snowflake, Python, Tableau, and Excel to automate recurring reporting, investigate operational anomalies, and support workload forecasting and capacity decisions.
- Worked with Data Engineering to trace data-integrity issues across sources, validate outputs, and restore confidence in business-critical reporting.
- Gathered user feedback, communicated technical findings to non-technical stakeholders, and delivered dashboard improvements across time zones.

Fraud Prevention Specialist

Apr 2022 – Present

Apple, Strategic Data Solutions

Cork, Ireland

- Investigated more than 22,000 payment-related transactions with 99.41% verified accuracy across EMEA and AMR in a high-volume operational environment.
- Applied hypothesis-based investigation to anomalous patterns, documented decisions, and coordinated escalations while protecting sensitive data.
- Identified recurring failure patterns and contributed to improvements in decision workflows and operational consistency.

Technical Support Supervisor and Mentor

Oct 2019 – Apr 2022

AppleCare, Apple

Cork, Ireland

- Owned complex technical support issues from triage through troubleshooting, escalation, resolution, and customer communication while maintaining satisfaction above 95%.
- Mentored advisors and tracked service-level performance to identify recurring issues and improve response quality.

Selected Technical Projects

Secure Workforce Data and AI Prototype – SDS Innovation Game

Internal, three-month project

- Built a workforce-operations prototype with Python, Snowflake, DuckDB, secured Parquet data, and LLM APIs; kept raw records within a controlled query layer rather than exposing them to the model.
- Contributed to a Git-to-Docker-image workflow using RIO and Shuri for internal deployments across Austin, Singapore, and Cork; troubleshoot configuration and release issues with the team.

PISA 2022 Cloud Data Pipeline

[GitHub](#) | [Case study](#)

- Designed a reproducible Python, SQL, and Google Cloud workflow to process 6.5 GB of education data through staged ingestion, Parquet transformation, validation, modelling, and reporting.
- Documented data-quality checks and downstream analysis so results could be traced back to the source data.

Cross-Locale LLM Evaluation Benchmark

[GitHub](#) | [Case study](#)

- Built a repeatable Python benchmark for Gemma 3 12B and Qwen 3 8B, comparing accuracy, confidence behaviour, and error patterns across five country contexts.
- Used structured evaluation and visual reporting to surface reliability differences hidden by aggregate results.

ROS 2 Robotics Module – MSc Artificial Intelligence

Current academic work

- Developing and troubleshooting ROS 2 robotics workflows in a Linux environment, using terminal-based tools and Python to work with nodes, topics, messages, and distributed robot components.

Education

MSc Artificial Intelligence (in progress), Munster Technological University	Expected 2027
Higher Diploma in Data Analytics, National College of Ireland	2023 – 2025
Professional Diploma in Corporate Fraud Investigation, City Colleges Dublin	2023
Master’s in Osteopathy, IDHEO, Nantes, France	2014 – 2019

Additional Information

Eligible to work in Ireland | French native speaker | English professional fluency | Apple employee since 2019
