Professional Profile

Current Apple Strategic Data Solutions Fraud Prevention Specialist with experience investigating payment transactions across EMEA and AMR. Combines fraud investigation with a Quality Business Analyst rotation covering SQL, Snowflake, Python and Tableau reporting. Experienced in identifying anomalous patterns, investigating data integrity issues and communicating findings across teams. Completing an MSc in Artificial Intelligence, building on a Higher Diploma in Data Analytics and a Professional Diploma in Corporate Fraud Investigation.

Core Skills

Investigation: Fraud and abuse patterns, transaction review, evidence assessment, anomaly investigation, documented decisions, escalation and sensitive data handling.

Analytics: Python, SQL, Snowflake, Tableau, Excel, data validation, operational metrics, trend analysis and recurring reporting.

Collaboration: Cross-functional communication, stakeholder requirements, analytical recommendations, mentoring and adapting to ambiguous cases.

Professional Experience

Fraud Prevention Specialist

Apr 2022 – Present

Apple, Strategic Data Solutions – Cork

- Investigated more than 22,000 payment-related transactions with 99.41% verified accuracy across EMEA and AMR, applying evidence-based judgement in a high-volume environment.
- Identified anomalous behaviour and transaction patterns, assessed complex cases and documented the evidence supporting decisions and escalations.
- Communicated findings to relevant stakeholders while handling sensitive information with confidentiality and care.
- Worked with incomplete information and changing priorities, contributing to consistent investigation and decision workflows.

Quality Business Analyst – Workforce Optimisation Rotation

Sep 2025 – Feb 2026

Apple, Strategic Data Solutions – Cork

- Supported Tableau workforce-management dashboards end to end for SDS teams in Austin, Singapore and Cork, tracking case inflow, productivity, backlog and service-level performance.
- Used SQL and Snowflake to source and validate reporting data; worked with Data Engineering to investigate data integrity issues and check downstream outputs.
- Analysed operational trends and supported workload forecasting and capacity decisions using Python, SQL, Tableau and Excel.
- Gathered user feedback, delivered dashboard updates and explained findings to leadership and non-technical stakeholders.

Technical Support Supervisor and Mentor

Oct 2019 – Apr 2022

AppleCare, Apple – Cork

- Owned complex technical issues through troubleshooting, escalation and resolution while maintaining customer satisfaction above 95%.
- Mentored advisors, monitored service metrics and communicated clear next steps in a fast-paced support environment.

Selected Data and AI Projects

PISA Educational Data Analysis and Modelling

[GitHub](#) | [Project website](#)

- Built a reproducible Python, SQL and Google Cloud workflow for processing and analysing large education datasets, including transformation to Parquet and data validation.
- Explored patterns, compared predictive models and documented findings through visual reporting, linking analysis back to the underlying data.
- Demonstrated practical experience interpreting complex datasets and translating technical results into understandable conclusions.

LLM Benchmark – Accuracy, Confidence and Cross-Locale Evaluation

[GitHub](#) | [Project website](#)

- Built a structured Python evaluation of Gemma 3 12B and Qwen 3 8B, comparing answer accuracy and confidence across baseline and locale-aware prompts.
- Analysed results across Azerbaijan, China, Iran, the UK and the US to examine variation hidden by overall scores.
- Used visual summaries and documented methodology to explain error patterns and the limits of confidence as an indicator of correctness.

SDS Innovation Game – Workforce Data Prototype

Internal, three-month hackathon

- Contributed to an internal workforce-operations prototype using Python, Snowflake, DuckDB and LLM APIs to support natural-language queries over operational data.
- Helped separate raw data processing from the language-model layer, developing practical experience in data handling, troubleshooting and collaborative problem solving.

Education

MSc Artificial Intelligence – in progress

Munster Technological University, Cork

Expected 2027

Higher Diploma in Data Analytics

National College of Ireland, Dublin

2023 – 2025

Professional Diploma in Corporate Fraud Investigation

City Colleges, Dublin

2023

Master's in Osteopathy

IDHEO, Nantes, France

2014 – 2019
