Simon Gobin

Technical Investigation | Data Quality | Operational Analytics

Cork, Ireland | +353 89 603 1609 | simon.gobin.do@gmail.com
Portfolio - ETS Technical Analyst | LinkedIn | GitHub

Professional Profile

Apple technical support and analytics professional with experience across AppleCare and Strategic Data Solutions. Combines end-to-end troubleshooting with a Quality Business Analyst rotation supporting Tableau dashboards, SQL and Snowflake reporting, data integrity investigations and user-driven improvements. Experienced in explaining findings to stakeholders across Austin, Singapore and Cork. Completing an MSc in Artificial Intelligence, with practical Python, cloud data and LLM integration projects.

Core Skills

Support and investigation: Issue triage, troubleshooting, root-cause investigation, escalation, documented decisions and customer communication.
Data and reporting: SQL, Python, Snowflake, Tableau, Excel, data validation, operational dashboards, trend analysis and reporting automation.
Delivery and collaboration: Requirements gathering, user feedback, cross-functional coordination, technical documentation, Git/GitHub, Docker and Linux project experience.
AI and cloud projects: LLM API integration, model evaluation, FastAPI, DuckDB, Parquet and Google Cloud workflows.

Professional Experience

Quality Business Analyst - Workforce Optimisation Rotation Sep 2025 - Feb 2026
Apple, Strategic Data Solutions - Cork

- Supported Tableau workforce-management dashboards end to end for teams in Austin, Singapore and Cork, tracking case inflow, productivity, backlog and service-level performance.
- Used SQL and Snowflake to source and validate reporting data; partnered with Data Engineering to investigate data integrity issues and verify downstream outputs.
- Used Python and Excel to automate recurring reporting and analyse operational trends supporting workload forecasting and capacity decisions.
- Gathered user requirements and feedback, delivered dashboard improvements and translated technical findings into clear updates for leadership and operational stakeholders.

Fraud Prevention Specialist Apr 2022 - Present
Apple, Strategic Data Solutions - Cork

- Investigated more than 22,000 payment-related transactions with 99.41% verified accuracy across EMEA and AMR in a high-volume operational environment.
- Assessed anomalous patterns and incomplete evidence, formed investigative hypotheses and documented the rationale for decisions and escalations.
- Communicated findings to relevant stakeholders, adapted to changing priorities and handled sensitive information with confidentiality.

Technical Support Supervisor and Mentor Oct 2019 - Apr 2022
AppleCare, Apple - Cork

- Owned complex technical issues from understanding the customer's problem through troubleshooting, escalation, resolution and clear follow-up, maintaining satisfaction above 95%.
- Mentored advisors and monitored service metrics to identify recurring issues and improve support quality.
- Explained technical findings and next steps in accessible language, helping customers and colleagues progress through ambiguous problems.

Selected Technical Projects

PISA Cloud Data Pipeline GitHub | Project website

- Built a reproducible Python, SQL and Google Cloud workflow for processing large education datasets, including Parquet transformation, validation, modelling and reporting.
- Documented data preparation and analytical results, supporting traceability from source data to interpretable outputs.

Private Local AI Platform GitHub

- Developed an MVP with AI-assisted tooling, combining React/TypeScript, a FastAPI REST API, SQLite conversation history and local Ollama model integration.
- Added Docker Compose configuration for a Linux GPU deployment, health and readiness endpoints, API tests and GitHub Actions checks for frontend and container builds.
- Documented setup, operational checks and limitations; target-server GPU performance validation remains a deployment step.

SDS Innovation Game - Workforce Data Prototype *Internal, three-month hackathon*

- Contributed to a Python, Snowflake, DuckDB and LLM API prototype for workforce operations, separating raw data processing from the language-model layer.
- Worked on an internal Docker image and deployment workflow, developing practical experience troubleshooting configuration and release issues with colleagues.

LLM Accuracy and Confidence Benchmark GitHub | Project website

- Built a structured Python comparison of Gemma 3 12B and Qwen 3 8B across five country contexts, analysing accuracy, confidence and error patterns.
- Produced visual summaries and documented methodology to explain reliability differences and the limitations of aggregate scores.

Education

MSc Artificial Intelligence - in progress Expected 2027
Munster Technological University, Cork

Higher Diploma in Data Analytics 2023 - 2025
National College of Ireland, Dublin

Professional Diploma in Corporate Fraud Investigation 2023
City Colleges, Dublin

Master's in Osteopathy 2014 - 2019
IDHEO, Nantes, France

Additional Information

Apple employee since 2019 | Based in Cork
French: native | English: professional fluency
Academic Linux experience through the ROS 2 robotics module in the MSc programme.
