Profile

Python and data practitioner with more than six years at Apple across Strategic Data Solutions and AppleCare, currently completing an MSc in Artificial Intelligence (expected 2027). During a Workforce Optimisation rotation, supported cross-geography reporting, demand and capacity analysis, Snowflake data integrity, and Tableau dashboards. Builds reproducible machine learning and data pipelines and translates operational needs into reliable tools. Seeking to apply this blend of engineering, analytics, and Apple operational context to supply chain automation and decision support.

Technical Skills

Software and data: Python, SQL, Snowflake, DuckDB, pandas, NumPy, relational data, Parquet, ETL/ELT, data validation

Machine learning: Scikit-learn, TensorFlow/Keras, XGBoost, CatBoost, LightGBM, regression, cross-validation, hyperparameter optimisation

Cloud and delivery: Google Cloud, Docker, Git/GitHub, CI/CD-style build and deployment workflows, reproducible notebooks

Analytics and collaboration: Tableau, forecasting, workforce planning, KPI reporting, requirements gathering, stakeholder communication, troubleshooting

Professional Experience

Quality Business Analyst – Workforce Optimisation Rotation

Sep 2025 – Feb 2026

Apple, Strategic Data Solutions

Cork, Ireland

- Supported workforce-management Tableau dashboards end to end for teams in Austin, Singapore, and Cork, from requirements and user feedback through validation, releases, and continuous improvement.
- Used SQL, Snowflake, Python, Tableau, and Excel for operational KPI reporting, workload forecasting, recurring analysis, and capacity-planning decisions.
- Partnered with Data Engineering to investigate data-integrity issues across sources, validate reporting outputs, and identify root causes of anomalies.
- Presented findings and proposed improvements to technical and non-technical stakeholders in a fast-paced operational environment.

Fraud Prevention Specialist

Apr 2022 – Present

Apple, Strategic Data Solutions

Cork, Ireland

- Investigated more than 22,000 payment-related transactions with 99.41% verified accuracy across EMEA and AMR, applying structured analysis under operational deadlines.
- Identified anomalous patterns and root causes while handling sensitive data, documenting decisions, and collaborating on process improvements.

Technical Support Supervisor and Mentor

Oct 2019 – Apr 2022

AppleCare, Apple

Cork, Ireland

- Resolved complex technical issues and mentored advisors while maintaining customer satisfaction above 95%.
- Monitored service-level performance, investigated recurring issues, and communicated practical actions to varied audiences.

Selected Engineering Projects

- Secure Workforce Data and AI Prototype – SDS Innovation Game***Internal, three-month project*
- Built a workforce-operations prototype using Python, Snowflake, DuckDB, secured Parquet data, and Claude/Gemini APIs to answer operational questions without exposing raw records to the model layer.
 - Contributed to a Git-to-Docker-image and internal deployment workflow across Austin, Singapore, and Cork environments, troubleshooting configuration and release issues.

- PISA 2022 Cloud Data Pipeline**[GitHub](#) | [Case study](#)
- Built a reproducible Python, SQL, and Google Cloud workflow to process 6.5 GB of source data through staged ingestion, Parquet transformation, analysis, predictive modelling, and visual reporting.
 - Documented data preparation and model evaluation to make results traceable and repeatable.

- House Prices Regression and Model Optimisation**[GitHub](#)
- Compared XGBoost, CatBoost, and LightGBM with feature engineering, out-of-fold validation, stacking, and Bayesian hyperparameter optimisation; achieved a top 1% Kaggle ranking.
 - Built a reproducible experiment workflow to evaluate accuracy and generalisation rather than relying on a single model run.

- Deep Learning Image Classification Benchmark**[GitHub](#)
- Compared convolutional neural networks, soft-voting ensembles, and MobileNetV2 transfer learning across 17 flower classes; reached 84.41% validation accuracy.

Education

MSc Artificial Intelligence (in progress) , Munster Technological University	<i>Expected 2027</i>
Higher Diploma in Data Analytics , National College of Ireland	2023 – 2025
Professional Diploma in Corporate Fraud Investigation , City Colleges Dublin	2023
Master’s in Osteopathy , IDHEO, Nantes, France	2014 – 2019

Additional Information

Eligible to work in Ireland | French native speaker | English professional fluency | Apple employee since 2019
